PROFESSIONAL SUMMARY

Detail-oriented technology professional with a strong foundation in Python, SQL, data engineering, and full-stack development, seeking to transition into SAP Data Migration consulting. Hands-on experience in data extraction, transformation, and validation through academic and internship projects. Familiar with relational databases (PostgreSQL, MySQL, MongoDB), RESTful API integration, and structured data pipelines. Adept at identifying data anomalies, performing root cause analysis, and supporting end-to-end data lifecycle workflows. Exposure to cloud platforms (AWS, GCP) and quick to adapt to enterprise tooling such as SAP BODS and Syniti.

CORE COMPETENCIES

SQL & Relational Databases	PostgreSQL, MySQL, MongoDB
Data Extraction & Validation	ETL concepts, data profiling, reconciliation, completeness & accuracy checks
Python Scripting	Pandas, NumPy, data transformation, cleansing automation, migration scripts
SAP Ecosystem Awareness	Understanding of SAP data objects, migration lifecycle (Extract, Transform, Load)
API & System Integration	REST API design & testing, JSON/XML data interchange, backend integration
Cloud Platforms	AWS (Certified), Google Cloud Associate Cloud Engineer (Certified)
Version Control & Agile	Git, GitHub, branching strategy, pull requests, sprint-based delivery
Reporting & Dashboards	Built real-time fraud dashboards; data visualization for business stakeholders

PROFESSIONAL EXPERIENCE

Python Full Stack Developer Intern

Council for Skills and Competencies (CSC India) | Jun 2025 – Sep 2025 | Remote

- Developed scalable web apps using **Django / Flask**, implementing data-driven features with structured schemas in **PostgreSQL** and **MySQL**.
- Designed, built, and tested **RESTful APIs** handling JSON payloads — directly relevant to data extraction and integration patterns used in SAP migration tooling.
- Performed **functional testing, defect tracking, and root cause analysis** to resolve data and application inconsistencies, reducing rework cycles.
- Maintained code integrity using **Git branching strategies** and collaborated in an **Agile** (sprint-based) environment with cross-functional teams.
- Translated business requirements into technical data models — experience mapping to **source-to-target field mapping** concepts in ETL/migration projects.

KEY PROJECTS

Hybrid ML-Based Health Insurance Fraud Detection

Team Lead | Python, XGBoost, SVM, PostgreSQL | Jan 2025

- Led end-to-end data pipeline: ingested raw insurance claim records, performed **data profiling, cleansing, and transformation** to prepare structured datasets for model training.
- Built **validation and reconciliation logic** to detect anomalies and null values — skills directly transferable to **data quality checks in SAP migration** projects.
- Developed a real-time dashboard for claim verification and fraud probability visualization; reduced simulated financial exposure by ~30%.
- Coordinated a 4-member team across data preparation, model development, and reporting phases in an Agile fashion.

Smart Safety Helmet System for Coal Mine Workers

Team Lead | IoT, LoRa, Cloud Logging | Aug 2024

- Architected a sensor-to-cloud **data integration pipeline**: raw sensor readings normalised and streamed to cloud storage for real-time alerting.
- Secured **INR 3 Lakh R&D grant** — demonstrating ability to document technical scope and present data-driven value to stakeholders.

- Implemented structured logging and alerting workflows, laying groundwork for understanding **data flow governance** in enterprise systems.

EDUCATION

B.Tech — Artificial Intelligence & Data Science (GPA: 8.73/10) <i>Velagapudi Ramakrishna Siddhartha Engineering College, Vijayawada</i>	2023 – Present
Diploma — Computer Engineering (89.17%) <i>AANM & VVRSR Polytechnic College</i>	2020 – 2023

CERTIFICATIONS

Google Cloud — Associate Cloud Engineer	AWS Cloud Practitioner Certification
Production Machine Learning Systems (Google)	Introduction to MongoDB
Introduction to Linux	ServiceNow Certified

AWARDS & ACHIEVEMENTS

- **INR 3 Lakh R&D Grant** — Smart Helmet Project (Government-backed research funding)
- **Appreciation Award** — Innovation Acquisition Summit (VIKAS-24)
- **1st Place** — Innovation Day, VR Siddhartha Engineering College
