

SRINIVASA RAO TALARI

☎ +91-8341492762 ✉ srinivasaraotalarii@gmail.com [in LinkedIn](#) [Github](#)

OBJECTIVE

Entry-level Application Support and Software Engineer with experience in Python development, functional testing, troubleshooting, and API integration. Skilled in debugging applications, defect identification, root cause analysis, and supporting software systems in Agile environments. Experienced in test case validation, REST API development, and collaborative problem solving. Seeking to contribute to application support, incident resolution, and system reliability.

EDUCATION

Velagapudi Ramakrishna Siddhartha Engineering College <i>Bachelor of Technology in Artificial Intelligence and Data Science (GPA: 8.73)</i>	2023 – 2026 Vijayawada
AANM & VVRSR Polytechnic College <i>Diploma in Computer Engineering (Percentage: 89.17%)</i>	2020 – 2023

EXPERIENCE

Python Full Stack Developer Intern ↗ <i>Council for Skills and Competencies (CSC India)</i>	06/2025 – 09/2025
- Contributed to end-to-end SDLC by developing scalable web applications using Python (Django, Flask), JavaScript, HTML5, and CSS3. - Performed debugging, troubleshooting, and defect resolution to improve system performance. Designed and tested RESTful APIs using JSON for backend services. - Assisted in functional testing, test case validation, and bug tracking during development cycles. Used Git and GitHub for version control and Agile collaboration.	

PROJECTS

Smart Safety Helmet System for Coal Mine Workers ↗ <u>IoT, Sensors, LoRa</u>	Aug 2024
- Team Lead: Designed and developed an IoT-based smart helmet for real-time worker safety monitoring. - Integrated gas sensors (MQ-4, MQ-135), temperature, and obstacle sensors for hazard detection. - Implemented LoRa communication, and cloud logging for real-time alerts. Secured 3 Lakh INR research funding for innovation and development.	
Hybrid ML-Based Health Insurance Fraud Detection ↗ <u>XGBoost, SVM, Python</u>	Jan 2025
- Team Lead: Developed a hybrid machine learning model using XGBoost and SVM for health insurance claim fraud detection. - Built a real-time dashboard for claim verification and fraud probability visualization. - Reduced financial losses by approximately 30% through intelligent prediction and analysis.	

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java (Basics), C
Web Development:: HTML5, CSS3, Responsive Design, DOM Manipulation, JavaScript Object Model, Django, Flask, Node.js, next.js, React, Seo
Software Testing: Functional Testing, Test Case Design, Defect Tracking, Bug Reporting
Databases: MongoDB, PostgreSQL, MySQL
Version Control:: Git, GitHub, Branching Strategy, Pull Requests
AI / Data Skills: Artificial Intelligence fundamentals, Machine Learning basics, Data Analytics, Embeddings and Vector Search (Basic Understanding), Sap

AWARDS AND ACHIEVEMENTS

- * **3 Lakh R&D Grant – Smart Helmet Project**
- * **Appreciation Award – Innovation Acquisition Summit (VIKAS-24)**
- * **1st Place – Innovation Day, Velagapudi Ramakrishna Siddhartha Engineering College**
