Google Ads Information

- **Google Search Ads:** A website or landing page is required.
- **Google Display Ads:** A website is required.
- **Performance Max Campaigns:** A website is generally required.
- **Call Ads:** In some cases, ads can run without a website, but Google may still require one during account setup or verification.
- **Lead Form Ads:** Available only for some accounts and campaign types. A website may still be recommended.

Important Note

Since you currently **do not have a website**, Google Ads is **not recommended** at this stage.

I recommend starting with **Meta Ads (Facebook & Instagram)** because they can generate leads directly through:

- WhatsApp
- Facebook Lead Forms
- Instagram Direct Messages
- Facebook Messenger

Once your website or landing page is ready, we can also run **Google Ads** to increase high-quality traffic, leads, and business growth.
