Vijayawada, India

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building end-to-end machine learning pipelines and fraud-detection systems. Proficient in Python, Scikit-learn, XGBoost, TensorFlow, and Pandas with strong command of data preprocessing, feature engineering, model training, and evaluation metrics (precision, recall, F1-score). B.Tech in AI & Data Science (GPA 8.73) · Rs.3L R&D grant recipient · Innovation award winner.

PROFESSIONAL EXPERIENCE

Python Full-Stack Developer Intern

Council for Skills and Competencies (CSC India) | Jun 2025 – Sep 2025

- Engineered scalable Django/Flask web applications, reducing backend response latency by **~35%** through query optimization and caching strategies.
- Designed and implemented **12+ RESTful APIs** with JSON payloads supporting ML model endpoints and frontend data pipelines.
- Automated defect tracking and regression test workflows, cutting manual QA effort by **~40%** per sprint cycle.
- Conducted functional testing and test-case validation for ML-integrated modules, reducing post-deployment bugs by **25%**.

KEY PROJECTS

Hybrid ML-Based Health Insurance Fraud Detection

Python · XGBoost · SVM · Scikit-learn · Pandas · NumPy · Flask | Jan 2025

- Architected** hybrid XGBoost + SVM ensemble achieving **94%+ accuracy**, F1-score of **0.91**, and recall of **96%** on imbalanced insurance claim datasets.
- Engineered** full ML pipeline: data cleaning, feature engineering, normalization (StandardScaler/MinMaxScaler), SMOTE oversampling, and cross-validated model training.
- Built real-time Flask dashboard for fraud probability visualization, reducing manual claim review time by **~30%**.
- Led team of 3 · Won **1st Place** at college Innovation Day.

Smart Safety Helmet System – IoT + Cloud

Python · IoT · LoRa · MQ-4/MQ-135 Sensors · Cloud Logging | Aug 2024

- Led end-to-end design of IoT safety platform integrating gas, temperature, and obstacle sensors with real-time hazard alerts, cutting incident-response time by **~60%**.
- Implemented LoRa long-range communication protocol for reliable data transmission in GPS-denied underground environments.
- Developed Python-based cloud logging pipeline for continuous sensor-stream monitoring and anomaly detection

EDUCATION

B.Tech – AI & Data Science

VR Siddhartha Engineering College
2023 – 2026 | **GPA: 8.73 / 10**

Diploma – Computer Engineering

AANM & VVRSR Polytechnic
2020 – 2023 | **89.17%**

TECHNICAL SKILLS

ML / AI: Scikit-learn, XGBoost, SVM, Random Forest, TensorFlow, PyTorch, SMOTE

Data Engineering: NumPy, Pandas, Feature Engineering, Normalization, EDA, Matplotlib, Seaborn

Model Evaluation: Accuracy, Precision, Recall, F1-Score, ROC-AUC, Confusion Matrix

Programming: Python (Advanced), JavaScript, TypeScript, C

Web & APIs: Django, Flask, REST APIs, HTML5, CSS3

Databases: MongoDB, MySQL

CERTIFICATIONS

- ✓ AWS Cloud Practitioner
- ✓ Google Cloud – Assoc. Cloud Engineer
- ✓ Production ML Systems (Google)
- ✓ Introduction to MongoDB
- ✓ Introduction to Linux
- ✓ ServiceNow Certified

AWARDS & ACHIEVEMENTS

- ★ Rs.3 Lakh R&D Grant – Smart Helmet Project
- ★ 1st Place – Innovation Day, VR Siddhartha EC
- ★ Appreciation Award – VIKAS-24 Innovation Summit
